Maintainance

CAUTION! To avoid electric shock and damage to your device, do not charge device while it is wet or in an area where it could get wet. Do not handle device, charger or cords with wet hands while charging. Whenever your device gets wet, dry it thoroughly with a clean, soft cloth. If your device has gotten wet, you should dry the inside of the charging port before inserting a power connector to charge your device. If the charging port is not fully dry, your device may operate abnormally. For example, it may charge more slowly or overheat.

Restricting Children's Access to Your Device

Your device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the device. Keep the device and all its parts and accessories out of the reach of small children.
